

Mavenir Case Study: Finding the perfect office.

| Overview and Challenges

Yehuda Adar, Mavenir's Global Facility Manager had to find just the right office space for the global technology software corporation in Bucharest, Romania -- quickly. With time ticking away, he needed to find the perfect office space to set up Mavenir's operations.

As Yehuda searched for an approach, he came across qbiq.

The software was different from anything he had seen before - allowing him to generate multiple layout plans and virtual tours of potential spaces within 24 hours. Yehuda was amazed and decided to give it a try.

| Solution

Using qbiq, Yehuda was able to quickly and easily compare various office spaces and accurately gauge the compatibility of each building and make data-driven decisions. Best of all, he could make all of this happen within a single day.

Yehuda was not only able to find the perfect office space for Mavenir in record time, but he was also able to do it in a cost-effective and data-driven way. The renovations for Mavenir's new office space in Bucharest, Romania were well underway.

“We are now building qbiq’s AI generated architectural plans. This platform is a true gamechanger. I have saved a huge amount of time and leg work” - Yehuda Adar, Mavenir
